**Abstract**

Childhood is considered the most innocent and dream-filled period of a person's life. However, not every individual experiences childhood in the same way. For some, it is a source of sweet memories, while for others, it remains a time filled with hardships and injustices. Sadridin Ayniy's novel "Odina" is one of the most significant works that depict such bitter realities. This article analyzes the theme of childhood as portrayed in the novel "Odina."

War has left many devastated, turning children into orphans, stealing their childhood joys, and making women widows while hunger prevailed. The protagonist of our story, Odina, experiences such hardships during his youth. At the age of twelve, he loses his parents and becomes an orphan. His father was a very poor man, possessing nothing but a single cow. Village elder Kamol assists in burying his father, but in return, Odina spends his life in servitude under the elder. He endures the oppression, tyranny, and cruelty of the elder, living without dreams or hopes. People would go to great lengths for their own benefit, even selling their conscience. During that time, most people lived solely for their own gain. It is easy to be a person, but not everyone can be humane. Humanity had nearly disappeared, and the poor suffered the most, being treated like animals. The village elder also exploits the young Odina, making him a shepherd. Despite being a child, he frequently suffers severe beatings. When his master is in a bad mood, Odina's bright days turn into dark nights, illustrating one of the many examples of human oppression.

Due to widespread illiteracy, the poor were unaware of their rights and blindly obeyed the wealthy and high-ranking officials. Many actions were taken against the Jadid movement, and even possessing a newspaper could result in a lifetime prison sentence. Many mothers witnessed the deaths of their children but could not resist. Such injustices are frequently encountered in Odina's life. He endures countless injustices and cruelty. So many separations,

suffering, and beatings break his young soul like a fragile sapling. Despite being a child, he does not experience a true childhood. He does not even have the right to dream. Eventually, he escapes from the elder's grasp and heads to Fergana to work in a cotton factory to marry his beloved, Gulbibi.

He works tirelessly, enduring severe hardship. The factory supervisor, Qurbonali, treats the workers as slaves. It is a case of "escaping the rain only to be caught in a hailstorm." Although Odina works twice as hard as his peers, he remains grateful for escaping the elder. During difficult times, thoughts of reuniting with Gulbibi give him strength. He endures many trials and hardships in his pursuit of love. However, due to his intense and constant labor, he contracts tuberculosis without realizing it.

Gulbibi is depicted as a loyal beloved. She waits for Odina and rejects all other suitors. However, the village elder Kamol also tries to pressure Gulbibi and forcibly marries her to his son, Ibod. Ultimately, the elder and his son become the reason for Gulbibi's tragic demise. Just as humans cannot live without water and air, they also cannot survive without dreams and hope. Every person comes into the world once and desires to live freely and happily. However, neither Odina nor Gulbibi had such freedom. Due to constant abuse at the elder's hands, Gulbibi dies. Similarly, Odina succumbs to tuberculosis in Tashkent.
