

INVESTMENT CAPACITY OF BANKS ACROSS STOCK MARKET SECTORS: AN ANALYTICAL APPROACH

Mardonov Shahriyor Kholmirzo ugli

Researcher, Tashkent State University of Economics

Today globalization and economic reforms stock market conditions countries economy important structural to the part around is going on . Precious papers market of capital free movement, investments attraction to be done and economic subjects in the middle financial of resources effective distribution In particular, the banking sector provides a leader from the participants one as, capital attraction to do, financial stability provide and other of the sectors to develop service in doing important role plays.

Stock market and then of banks importance about one row foreign economist scientists Allen and Gale themselves in research banks and the stock market economic in development each other filler role the monitoring and risks in management advantage of the stock market and of capital effective to the distribution service to do showing Also¹, local from scientists Saidkulov B research on the banking sector stock market infrastructure development , investors for reliable environment create and modern financial instruments current in the making place and importance analysis He is the bank's stock market activity Uzbekistan economic stability main guarantee that it is emphasizes².

Uzbekistan stock market last in years noticeable at the level developed, in which the banking sector activity and investment potential increasing In particular, the results of 2023 in our country banks by stock market tools through attraction done investments size other to networks relatively high of banks economic in progress caught place and importance again one there is confirms.

Figure 1. In the “Tashkent” Republican Stock Exchange in 2023 networks according to valuable papers market through attraction done investments volume (billion) soums)³

Above on the graph reflection As it was, in 2023, the “Tashkent” Republican Stock Exchange will be listed on the papers market through total 2,712.75 billion soums investment attraction done this is indicator country financial market from the development evidence Investments networks in the section analysis to be done if so, the following main trends and conclusions to the surface comes out. The largest share – banks in the sector Statistical to the information according to, banks sector 971.97 billion soums (total) investments approximately 35.8 percent with the most leader place This is primarily due to the banks by asset investment politics being held, on the stock exchange own shares and bonds active is being placed with Finance system other to the participants relatively banks high reliability and to stability has investors for the most attractive industry as manifestation is happening. From banks last large investment size agro-industry to the field right comes – 597.74 billion soums (22%). This indicator last in years village farm and to him/her related industry to the fields state and private investments increasing going Others (702.69 billion) soums, 25.9%) category is also significant to share has this is on the ground different shuttle and service show sectors, small business and other economic segments concentrated. Industry and energy in the fields suitable 108.45 billion soums and 119.45 billion soums investment attraction These indicators are this on the networks investment activity average at the level that it is Industry and energy sectors of the economy

³ RSE Tashkent official website <https://uzse.uz> information .

of the main " drivers" calculated in consideration in this case , in directions investments size increase for new financial instruments and reforms current to grow Insurance (77.23 billion soums), transport (66.54 billion soums), construction (17.76 billion soums), communications (37.01 billion soums) and leasing (13.90 billion soums) in the following areas: investments relatively low level is , this on the networks valuable papers through investment attraction to do potential still complete to the surface that it didn't come out This means stock market in sectors from mechanisms use expansion for additional stimulating measures necessary.

Banks in the stock market of the sector leader place possession one how many important factors with related:

- Financial stability and Trust: Banks investors for the most reliable financial institute is considered, this and their valuable papers further attractive does
- New financial of instruments current to be done: Last in years banks by various bonds, deposit certificates, shares and other financial tools release this the process accelerated.
- State and regulator of the policy Support: Banks valuable papers in the market to participate stimulating reforms sector activity to increase service did.
- Multiplicative Impact: Banks by attraction done investments of the economy other credit, financial service and investment resources in appearance impact shows.

Conclusion instead of this we bring okay, 2023 results based on the Tashkent RSE networks in the section valuable papers market through attraction done investments in the composition banks sector leader that is obvious It seems. This is of banks not only own capital increase, maybe whole economy for investment environment creation, financial stability and to progress service to do shows. With this together , other stock market in networks too opportunities expansion for new approach and reforms the necessity highlight necessary .
